

Professional Summary

Integrated M.Tech Information Technology student and MERN stack enthusiast with knowledge of HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs, MySQL, MongoDB, and Git. Interested in frontend development, backend API development, and learning PHP/Laravel through real-world internship projects.

Education

Integrated M.Tech in Information Technology 2022 – 2027 International Institute of Professional Studies, DAVV, Indore
CGPA: 7.33

Technical Skills

Languages:

HTML, CSS, React.js, Redux Toolkit, Tailwind CSS **Backend:**

MongoDB, Mongoose, MySQL **Tools:**

CRUD Operations, HTTP Requests, API Integration, Authentication Basics, MVC Structure

Java, JavaScript, SQL, Basic PHP **Frontend:**

Node.js, Express.js, REST APIs, JWT Authentication, Basic PHP/Laravel Understanding **Database:**

Git, GitHub, Postman, VS Code **Concepts:**

Projects

BuildMart – House Raw Material Marketplace MERN Stack A web application for browsing construction raw materials and managing marketplace features.

- Developed responsive frontend pages for construction material products such as cement, bricks, tiles, steel, sand, and wood.
- Created user-friendly UI sections for product listings, vendor details, cart flow, and dashboard pages.
- Built and integrated REST APIs for product, vendor, cart, and order-related features.
- Used MongoDB and Mongoose for storing product, user, vendor, cart, and order data.
- Practiced authentication, protected routes, API testing, debugging, and GitHub-based version control.

Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Mongoose, REST APIs, Git, Postman

Blog App – Blogging Platform React.js, Redux Toolkit, Node.js A blog application for managing blog posts with frontend state management and backend APIs.

- Built a structured frontend setup including components, features, hooks, images, and pages.
- Configured Redux Toolkit store with separate auth and blog slices for managing application state.
- Developed REST APIs for creating, fetching, updating, and deleting blog posts.
- Connected React frontend with Express backend using API calls.
- Practiced CRUD operations, database connectivity, debugging, and API testing using Postman.

Tech Stack: React.js, Redux Toolkit, JavaScript, CSS, Node.js, Express.js, MongoDB, REST APIs

Coursework

Data Structures and Algorithms, Database Management System, Object-Oriented Programming, Operating System, Computer Networks, Web Development

Certifications and Strengths

- Java Programming Certification – OSOP Coding Institute, Indore.
- Postman API Testing Certification.
- Familiar with Git commands like clone, commit, push, and basic version control workflow.
- Good understanding of HTML, CSS, JavaScript, REST APIs, HTTP requests, and database basics.
- Quick learner with strong problem-solving attitude and willingness to learn PHP/Laravel.
